

Care and maintenance

Sintered slabs have a surface that's resistant to stains, hygienic and easy to maintain.

For routine cleaning, it is enough to follow a few simple precautions which are mainly common sense once the material's characteristics are borne in mind.

- Use neutral, wax-free detergents diluted in water, always following the instructions on the packs.
- Clean water may be sufficient for frequent washes.
- Do not use acidic products or abrasive tools, which may make the surface of lux materials matt.

Waxes, oily soaps and impregnating materials (water and oil-repellents) should not be used on porcelain stoneware.

Take care to follow the instructions provided by the producer on the pack of the product used. Before cleaning the surface installed, it is always best to test the cleaning agents first on a sample of the material which has not been installed, or on a small, not very visible area.

If the product requires cleaning due to particularly stubborn stains, action should be taken as soon as possible, using the specific detergents recommended in the table below:

STAIN FOR REMOVAL	TYPE OF DETERGENT
OIL AND GREASE	ALKALINE CLEANERS
BEER	
CHEWING GUM	
VINYL GLUE	
WAX PASTEL MARKS	ALKALINE STAIN-REMOVERS OR SOLVENTS
INK	ALKALINE STAIN-REMOVERS OR CLEANERS
NICOTINE	
MARKER PEN STAINS	
HAIR DYE	
COFFEE	
WINE	
BLOOD	
COCA COLA	
LIMESCALE	ACID CLEANERS OR ACID DESCALER
PENCIL	
VARNISH - PAINT	ALKALINE PAINT STRIPPERS OR SOLVENTS

On lux products, do not use acid cleaners at high concentrations. They should be diluted in water to 10-15%.
